

Remotely manage and protect any of your BlackBerry smartphones

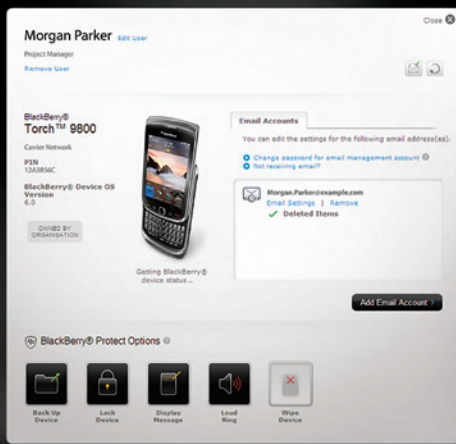

BlackBerry Management Center

BlackBerry® Management Center is a free, web-based service that gives you a simple, more efficient way to manage and protect your BlackBerry® smartphones remotely. Designed for businesses with up to 100 employees, BlackBerry Management Center supports both company and employee-owned devices. So you can give your people all of the BlackBerry services they want, while protecting your business communications securely in the cloud.

Devices shown from left to right: BlackBerry® Curve™ 9360 smartphone, BlackBerry® Bold™ 9900 smartphone, BlackBerry® Torch™ 9810 smartphone, BlackBerry® Bold™ 9900 smartphone and BlackBerry® Curve™ 9360 smartphone.

Business ready

Easy to use

No technical background? No problem! Managing and protecting your BlackBerry smartphones is simple with BlackBerry Management Center. The intuitive interface makes it easy to use. And it works with your hosted email provider, so you get added control without added complexity.

Manage company and employee-owned devices

Whether you provide BlackBerry smartphones to your employees for business purposes or allow your employees to use their own, BlackBerry Management Center helps you centralise smartphone management.

Make employee-owned devices a business asset

Allowing your employees to use their own BlackBerry smartphones for business purposes connects them with the business tools they need - while letting them stay in touch with the personal information they want. Their familiarity with BlackBerry also helps reduce employee training, so they can start working right away.

No technical expertise? No problem!

Simple, fast management of BlackBerry smartphones

BlackBerry Management Center is a free, cloud-based administration service – no additional hardware or software is required. So you can reduce costs and time spent maintaining your infrastructure, while keeping your organisation's information flowing and protected.

Troubleshoot from almost anywhere

Because BlackBerry Management Center is cloud-based, you can use it to manage BlackBerry smartphones on the go. Set up and troubleshoot your end-users' email, help them find misplaced devices, and lock, wipe or display messages on devices remotely - from home, from the office or on the road.

Locate and protect misplaced smartphones

If a BlackBerry smartphone is misplaced, you can initiate a loud ring remotely to help a user find the device. Lost device? Display a message on the screen of the smartphone that provides instructions for its return. If a device is stolen, send a command remotely to lock it, or even wipe information completely, to ensure an end-user's information doesn't fall into the wrong hands.

Requirements

- An Internet browser with an Internet connection
- BlackBerry smartphones with BlackBerry® Device Software version 4.6 or later
